Mumbai, Maharashtra, India

EXPERIENCE

ZEEVE

Intern, Mumbai, India

Jan 2022 –
April 2022

- Founded a **CI/CD pipeline** that helped with faster integration and deployment of newer software and applications.
- Increased the **production rate by 40-50%** and helped various departments with smooth and swift software development life cycle.
- Worked with technologies like **Gitlab runners, AWS ECR, AWS EKS, Kubernetes, Docker, Helm.**

CMP INFOTECH

Intern, Mumbai, India

April 2021 –
May 2021

- Completed a **User Details Registration software using JAVA** which helps with the digital documentation of users.
- This software helps with keeping a track of all the users with their details which will help the developers to gain insights into the type of users in their system.
- Helps by **improving efficiency** by storing data in a database rather than in books which helps with faster lookup and manipulation of data.
- Made with the help of **JavaFX and Gluon scene builder.**

PROJECTS

MOCK TEST WEBSITE

Personal Project

Feb 2021 –
May 2021

- Spearheaded a website that helps developers like myself to **learn/sharpen their programming skills in a fun MCQ way.**
- Helps programmers to increase their knowledge by **10-20%** with this web app.
- Developed with the help of tech like **Flask, MySQL, ChartJS.**

E-COMMERCE WEBSITE

Personal Project

July 2021 –
Sep 2021

- **Co-authored and Co-ordinated a team of 4** to create an **E-Commerce website to buy and sell artifacts** which helps both buyer and seller with their search of buying/selling of artifacts and **saving time and money.**
- Coded with the help of **MERN stack, MongoDB and StripeJS.**

PRODUCTION WEB PAGE

Leisure and Cultural Services Department

MOCK TEST WEBSITE

Feb 2021 –
May 2021

Personal Project

- Spearheaded a website that helps developers like myself to **learn/sharpen their programming skills in a fun MCQ way.**
 - Helps programmers to increase their knowledge by **10-20%** with this web app.
 - Developed with the help of tech like **Flask, MySQL, ChartJS.**
-
- Engineered a production-ready **web page for the Leisure and Cultural Services Department (Government of Hong Kong)** to track the number of visitors coming to the venue.
 - This helped with keeping track of people traffic and lessened the human work **improving efficiency and saving time.**
 - Assembled using **React, Ant design as frontend, and Express as backend, and Nginx as the webserver.**

TECHNICAL SKILLS

Languages	Python, Shell, JavaScript, SQL, HTML5, PHP, CSS.
Frameworks	React, Flask, Jinja2, Next.
Storage	MySQL, MongoDB.
Version Control	Git, GITLAB.
DevOps	Docker, Kubernetes, Helm.
Platforms	Linux, GCP, Heroku, Windows, AWS.

EDUCATION

BE (Information Technology Engineering)	Xavier Institute of Engineering Mumbai, Maharashtra	06/2023
---	--	---------

CERTIFICATIONS AND PUBLICATIONS

Workshop on DevOps	<ul style="list-style-type: none">• Good understanding of CI/CD workflows which is the main concern of any production deployment.• Got a hands-on experience with Docker, Kubernetes.• Understood the concepts of Containerization, Images, Clusters as well as Load Balancing.
JAVA for Beginners Workshop	<ul style="list-style-type: none">• Understood the core concepts of JAVA programming language.• Got an idea of all the fields and places where JAVA can be a better fit compared to other programming languages.
