PROFILE

3 years of experience as Full Stack Web Developer and 2 years of experience as DevOps Engineer. Experience in designing, developing & troubleshooting software code using ReactJS for software components of web applications. Hands-on Experience in NoSQL Database - MongoDB also in Docker and AWS. Gained Practical Knowledge of Linux Commands and implemented a production NodeJS environment on a fresh server.

EXPERIENCE

ZEEVE

Jan 2022 – April 2022

Intern, Mumbai, India

- I created a DevOps pipeline from scratch.
- I helped create a GitLab runner that automates the deployment of Docker images with a simple command.
- Helped the team to design the pipeline in question.
- Kubernetes, Docker, GitLab.

CMP INFOTECH

April 2021 – May 2021

Intern, Mumbai, India

- User Details Registration using JAVA
- JavaFx
- Gluon Scene builder

PROJECTS

MOCK TEST WEBSITE

Feb 2021 – May 2021

Personal Project

- Website to test your programming knowledge by giving mock MCQ tests build using Flask, MySql, and ChartJS.

E-COMMERCE WEBSITE

July 2021 – Sep 2021

Personal Project

- Created an E-Commerce website to buy artifacts using React, Material-UI, React-Stripe as frontend and Express as backend and MongoDB as database, StripeJS for payment gateway.

PRODUCTION WEB PAGE

Sep 2022 – Sep 2022

Leisure and Cultural Services Department

- *Created a production-ready web page for the Leisure and Cultural Services Department (Government of Hong Kong) to track the number of visitors coming to the venue using React,*

Ant design as frontend, and Express as backend, and Nginx as the webserver.

TECHNICAL SKILLS
